# Fedora Linux Servers With Systemd: Second Edition

## Synopsis

This book is designed as a server reference for Fedora Linux with systemd. This second edition covers Fedora Linux 23. Administration tools are covered as well as the underlying configuration files and system implementations. The emphasis is on what administrators will need to know to perform key networking and server tasks. Topics covered include the systemd service manager, the systemd service and target files for each server, server roles, and the firewalld firewall. Key servers are examined, including Web, FTP, CUPS printing, NFS, and Samba. Network support servers and applications covered include the Squid proxy server, the Domain Name System server, and DHCP.
