Customer Reviews

This series of books - we have five of them - has lots and lots of information about title subject. Grandkids and I don't read book in its entirety, rather they look at pictures and tell me which explanations they want to hear.

My kids really enjoy these books! Highly recommend ... great topics, colorful illustrations, and educational fun. It's great for one-on-one time or as a family. We really enjoyed them on our camping trips. The teachers enjoy them for the classroom - great gifts!

Fantastic introduction to science facts in small, easy to read segments. Beautiful pictures as well.

Note: If you buy more than one title, note that they are now produced in two different sizes.

My son loves these books! Great for four to eight year olds, I highly recommend this series, "I

wonder why."

This series of books are just great for kids. Very educational.
