I own several of Julie Emerson’s animal coloring books so I was intrigued to see that she had come out with a floral book. The designs in this book are a bit of a departure from what I am used to from Ms. Emerson but they are quite lovely as well. The designs depict realistic but not overly detailed floral bouquets. There are no backgrounds, almost all of the designs are just the flowers either in vases or tied together with ribbons. There are roses, lilies, poppies, orchids, daisies and much more.I like the level of detail as it makes for an interesting project to color but one that can be finished fairly quickly. As a gardener, I really appreciate that the flowers are depicted naturally and not with a lot of doodles in them. I like doodle designs as well but I especially like to color flowers in a more realistic way.This is what I discovered when coloring in this book and testing the paper with my coloring medium. In the comments section below, I will list the various coloring mediums I use for testing and coloring.30 Designs of Floral Bouquets plus a color-able title pagePrinted one side of the pagePaper is typical CreateSpace paper: thin, white, slightly rough and non-perforatedGlue

BoundDesigns do not merge into the binding there is plenty of room to cut the pages out if you choose to do so.Book opens fairly flat for coloring by breaking or creasing the spine.Alcohol and water-based markers bleed through this paper. Water-based are more spotty rather than how the alcohol-based flow through rapidly.Gel pens and India ink pens leave colorful shadows on the back of the page. India ink can seep through in spots if you apply multiple layers of ink.
