Larry Gets Lost In Prehistoric Times: From Dinosaurs To The Stone Age

Synopsis

This is a first in a new Larry Gets Lost series that features adventures back through time. In Larry the lovable pup's latest adventure, he falls asleep at home next to Pete (who is reading a book about dinosaurs) and travels back in time, waking up in the pre-historic era! Starting with dinosaurs, where he encounters some big (the Tyrannosaurus Rex and Tricerotops), and others small (the Iberomesornis), he tumbles forward to the Ice Ages where he meets a Woolly Mammoth, and on to the cavemen of the Stone Age. But will he ever find his way back to his best friend Pete and the family again?

I was searching through Pinterest when I saw a book recommendation list - I think it was "books around the world" or something. Anyway, one of the books on the list was a "Larry Gets Lost" book, and they mentioned that it was a series. I immediately took to to see what else was in the series. When I found this book, I just knew my 3 and a half year old son would love it! He's into dinosaurs. I was right, and I love it too. The artwork is great, and I like all the factoids in the book. They aren't part of the story, so I don't *have* to read them, but when the 3 year old has a question (and he inevitably always does), I can generally answer it without saying, "I don't know, we'll have to look that up later." Great book. Now I need to get the rest of them.

We love the Larry Gets Lost series! We got the Chicago book for our daughter when she was born and recently got the 'Under the Sea' and 'Prehistoric Times' books as she is obsessed with sealife and dinosaurs. We read them over and over!! love the visual art style as much as the stories but they are just as much of a fun read for grownups. No oversimplification of facts for little minds :) Just good fun.

We have the SF, NYC and Prehistoric versions of Larry books and my LO loves them all!!

fun easy read to improve my childs confidence and enjoyment with reading
