Ice Age Cave Bear: The Giant Beast That Terrified Ancient Humans

Synopsis

Giant cave bears were creatures to be feared “and revered. Thousands of years ago, early humans painted images of them on cave walls. By the end of the ice age, the last of the cave bears had died out. The only things left were their bones “hundreds of thousands of bones “and eerie paintings in the caves they once inhabited. Ice Age Cave Bear tells the story of these massive creatures in fascinating detail “what they looked like, where and how they lived, and what may have caused their extinction. Author Barbara Hehner takes us back to a time when the enormous bears lived alongside such ice age giants as mammoths, woolly rhinos, and cave lions “as well as Neanderthals and other early human beings. And she examines the question of whether or not ancient peoples actually worshipped the cave bear.

Book Information

Hardcover: 32 pages

Grade Level: 2 - 5

Customer Reviews

Mark Hallett provides eye-catching, realistic illustrations to accompany the dramatic story of massive giant cave bears who were feared thousands of years ago. Kids in grades 5-6 will find this slim-looking book anything but a simple reader: it’s packed with information and smaller print than usual, but has a high interest level to keep kids excited about the prehistoric creatures.

This is a really good book with great vivid pictures. My seven year old son loved it.

Book in excellent shape for the cost.
