Learning About Rocks (Dover Little Activity Books)

Synopsis

Children will find this easy-to-read guide perfect for identifying the three main classes of rocks (igneous, sedimentary, and metamorphic) and 12 different kinds of common rocks: granite, sandstone, limestone, marble, slate, obsidian, and six others. Each page contains a concise, fact-filled text about one of the rocks, with a blank space for a sticker illustration. As youngsters read and learn about each type of rock, they place one of the 12 accurate, realistic stickers provided in the appropriate blank space. A great hands-on way to learn about the rocks around us, this fact-filled little activity book will also appeal to parents and teachers looking for inexpensive learning aids.
