Science, Nature & How It Works

Age Range: 5 - 10 years

Grade Level: Kindergarten - 4

Customer Reviews

Michael Dahl does a great job talking about everyday ramps and their uses. Denise Shae's illustrations are crystal clear and kid friendly. My kids are "too old" for picture books, but this series keeps them interested because of the machines.

Perfect for my kindergarten class!

If you are looking for a texts that clearly and simply teaches about simple machines then this text is for you. It is a real asset to our K-2 book room

Another great introduction for young students to simple machines! I used this as an anchor text for a physics unit.
